

4th February 2019

Dear Parent/Carer,

Re: Y11 Revision Sessions

As the GCSE examinations approach, we will be offering additional revision sessions for GCSE Science topics which were identified as very insecure in the recent mock examinations.

These sessions will take place on a Wednesday afternoon until 2.30pm. Pupils will be given the chance to have a short lunch break then they will complete the additional lessons in the science laboratory. As college transport will have already left by this time, pupils will need to make arrangements to get home once the sessions have finished.

Below is a table detailing the dates of each session and topics that will be studied for each one.

Date	Content covered	GCSE topic
6/2/19	Bioenergetics	B4
13/2/19	Molar calculations	C3
27/2/19	Radiation and half-life	P4
6/3/19	Atoms and Rates of reaction	C1 and C5
13/3/19	Reactions with acids, balancing equations	C4
20/3/19	Infection and response/Ecology	B3 and B5
10/4/19	Energy	P1
1/5/19	Electrolysis and half equations	C4
8/5/19	Homeostasis	B5

Please return the slip below, identifying which sessions your child will be attending and their arrangements for getting home.

Yours sincerely,

Mrs Corrigan
